Magicians have used mathematical ideas in their tricks for hundreds of years to entertain and mystify. Martin Gardner’s book “Mathematics, Magic, and Mystery” sparked a renewed interest in using mathematics in the construction of magic tricks, delighting both amateur magicians and professional mathematicians. We will explore some of the math behind the magic.

Go to mathaware.org for 30 days of videos and articles on mathematical magic tricks, mysteries, puzzles, illusions, and more!

4:30 PM - 253 Malott Hall - Cornell University

Join the speaker after the talk in Malott 532 for pizza and conversation, sponsored by the Math Club.
