4.3.31 and 4.3.32. Express your arguments in grammatically correct, complete sentences.

Do not just throw down lines of equations without clearly explaining why each equation is there. Connect each equation logically to the next one using phrases like ‘since’, ‘therefore’, ‘there exist’, ‘because’, and so on.

If you’re unsure how to do this, read the posted homework solutions carefully and use them as guidelines for how to express these arguments.
